

2a Court Road.

2a Court Road provides 24-hour support to 15 people with learning disabilities who, on occasion, may display behaviours that challenge.

The ladies and gentlemen living there vary in age. Everyone at the home is supported in a person-centred way to meet individual needs by using Essential Lifestyle Plans, to enable them to live the lives they choose.

Facilities

The home is split into three houses, each of which is home to five people. Two of the houses are ground floor and the other one has stairs but has a stair lift. All bath/shower rooms are easily accessible and have specialist equipment in place.

There is also a shared area which includes an activity room and a sensory room which provides a relaxing, quiet and therapeutic place to enjoy. There are also three lovely, large gardens with an accessible path linking them together so people can wander and enjoy the tranquil setting.

The home is in close proximity to local facilities in Kingswood, including shops, restaurants, cafes and parks. It is also on one of the major bus routes from Bristol to Bath.

Activities

The home has an Activity Co-ordinator who organises trips, events and activities to meet individual interests and hobbies. Examples include going to church, swimming, horse riding, trips to the pub, going to the cinema and to singalongs.

There are also two house vehicles, one of which is adapted for wheelchairs.

Service at a glance

Type of service: Residential

Good

“

Staff had an excellent understanding of people's needs and found imaginative ways to ensure people were supported in a person-centred way which put people at the centre of the service.

CQC Inspection, March 2019

Staff team

All staff at the home are experienced in supporting people with complex needs, especially those with autism, epilepsy, physical disabilities and communication difficulties. We provide an exceptionally high standard of care and ensure that each resident leads a fulfilling and meaningful life.
